Re: Request to Amend a Specification

PCT/AU2004/001026

Dear Commissioner for Patents,

Further to the amendments described in the letter dated 27th April, 2005, I would also like to make some additional amendments to the application.

The reason for the amendments is to add illustrate another embodiment of the invention where a curved spade instead of teeth is used; to rewrite parts of the specification to make it easier to read (due to the many previous amendments); to rewrite the claims to reduce the total number of independent claims; and to modify claims to emphasize the substrate supporting feature of the invention.

I have enclosed a marked copy of the amended specification, as well as a clean copy of the amended specification. I have also enclosed instructions listing the amendments to the descriptions, claims and drawing.

Please do not hesitate to contact me if there are any outstanding issues,

Yours sincerely,

Louis Pan
